## *Principal's Message*

Dear Students,

**“Education is not the learning of facts, but the training of the mind to think” – Albert Einstein**

“Our Education system encourages learning based on facts. But the facts alone cannot guide the thought process of students towards a productive end. We have to take inspiration from the natural environment and cultivate creative thinking capabilities. The new National Education Policy 2020 was designed to inculcate both learning and research aptitude in the learners’ minds. So transform yourself into one of the greatest minds of the world in future.

**Dr. C. Yoganjaneyulu**

### Editorial Board
